

The U.S. Army Corps of Engineers of Engineers

“Serving The Nation And Our Armed Forces”

The Corps is organized geographically into 9 divisions with over 40 subordinate Districts throughout the world including the U.S., Asia and Europe. The districts oversee project offices throughout the world.

A diverse workforce of military and civilian engineers, scientists, and other specialists work hand in hand to meet the Corps' mission including:

Water Resources Development

Creating synergy between water resources development and the environment.

The Environment

Restoring, managing and enhancing ecosystems, local and national.

Infrastructure

Building and sustaining the critical facilities for military installations and the public.

Disasters

Responding to local, national and global disasters.

War Fighting

Providing full spectrum engineering and contingency support.

PROGRAMS, EXHIBITS, & TOURS

U.S. Army Corps of Engineers' Park Rangers are on duty to assist visitors during operating hours.

Tours are available for school and community groups. For more information please call (808) 438-2815.

The U.S. Army Corps of Engineers
presents

“Partners in the Pacific”

The audio-visual and interpretive presentations emphasize the Corps' partnership with local governments to improve and enhance water resources development and environmental missions in Hawaii and other Pacific areas.

FREE ADMISSION

Aloha, E Komo Mai, Welcome
to the U.S. Army Corps of Engineers Honolulu District's
Pacific Regional Visitor Center

The Pacific Regional Visitor Center is located on the second floor gun deck of the historic Battery Randolph at Fort DeRussy, Honolulu on the grounds of the Hale Koa Hotel.

The Honolulu District

"America's Engineers in the Pacific"

With headquarters at Fort Shafter, the Honolulu District has the largest geographical area of any Corps district, stretching from Hawai'i through Polynesia and Micronesia. Many of the District's projects are in places like Palau, American Samoa, Guam, the Commonwealth of the Northern Marianas, and Kwajalein. Today, the Honolulu District has six primary missions:

1. Civil Works and International and Interagency Services. Civil Works includes commercial port and small boat harbor development, flood control, beach erosion control and shoreline protection. The International and Interagency Services program enables the district to partner with local, state, and federal agencies and, in some cases, foreign nations.

The U.S. Army Corps of Engineers, Honolulu District's Pacific Regional Visitor Center first opened its doors at Battery Randolph in 1983. Its goal is to enhance the public's understanding of the multi-dimensional role of the U.S. Army and the U.S. Army Corps of Engineers. Particular emphasis is on civil works and water resources development that affects the lives of all the residents of Hawai'i and the people of the Pacific. The Pacific Regional Visitor Center is located on the second floor of historic Battery Randolph at Fort DeRussy, Waikiki (Above the Hawaii Army Museum). Battery Randolph is listed on the National Register of Historic Sites and is one of 16 coastal fortifications built by the Corps between 1906 and 1917 for the protection of Honolulu and Pearl harbors.

2. Military Support, including major construction programs and a range of other assistance.

3. Real Estate Services for the military.

4. Environmental Services, includes programs that protect endangered species and cultural resources at civil works projects and military installations, and the management of the Department of Defense's Formerly Used Defense Sites (FUDS) program.

5. Regulatory, which reviews, evaluates, and makes permit decisions on proposed projects

Kane'ohe-Kailua Area Flood Control Project, Island of O'ahu. The project consists of a dam and reservoir on Kamo'oali'i Stream, channel improvements at the mouth of Kane'ohe Stream, and a public recreation park named Ho'omaluhia or "to make a place of peace and tranquility."

that would impact wetlands and navigable U.S. waterways.

6. Emergency Management which provides essential contingency planning and response services throughout the Pacific and the continental U.S. Emergency Management supports civil emergencies, such as natural disasters, and military contingencies.

JROTC cadets view model of Core-Loc® Concrete Armor. Core-loc is a concrete armor unit for breakwaters and shore protection works.
