

How to Request a Speaker

If you are interested in contacting a bureau speaker for an event, contact the U.S. Army Corps of Engineers – Honolulu Engineer District Speakers Bureau coordinator at (808) 835-4003.

We'll need to know the date, time and location of the speaking engagement and a general idea of the topic your group is interested in.

The Honolulu District Speakers Bureau provides background information on the speaker and additional background material on the speech subject upon request.

To request a speaker, please send a written request (via regular mail or email) to:

U.S. Army Corps of Engineers
Honolulu District
Speakers Bureau
Public Affairs Office
Bldg 230, Room 302
Fort Shafter, HI 96858
Telephone: (808) 835-4003

Dear Program Chairman:

The United States Army Corps of Engineers, Honolulu District is excited to be part of several cutting-edge programs within our 500,000 square mile area of responsibility.

The continuing story of the Corps of Engineers and its service to the citizens of the Pacific and the nation is varied and interesting.

As one of the largest engineering groups in the world, we are proud of our reputation as the nation's premier public engineering organization.

We are involved, at the direction of Congress, with developing, managing and protecting water resources, including navigation, flood control, shore protection, environmental restoration, regulatory and project related recreational development. We also respond to needs created by natural disasters, such as typhoons, flooding and earthquakes in our area of responsibility, as well as those within other Corps districts around the world.

This brochure contains a list of subjects available through the District's Speaker Bureau Program. We would be happy to brief your organization on Corps programs and projects, particularly those in your area and the Corps expertise.

Thomas D. Asbery
Lt. Colonel,
Honolulu District
Engineer

Honolulu District *Speakers Bureau*

America's Engineers in the Pacific

Our civil works, military construction and environmental missions have evolved over time — in periods of peace and war — for nearly a century.

Today, Honolulu District is a full-service district, well prepared to provide a wide range of timely, effective, innovative solutions to meet our customers' engineering, construction and environmental needs.

Honolulu District offers project management, design, construction management, contracting, cost engineering and more.

Speaker Topics Include:

- Program and Projects**
 - Construction productivity
 - Partnering
 - A concept of cooperative partnership between the contractor and the owner
 - Resource Management in the Corps
 - Project Management Program
 - Project formulation and evaluation
 - Corps planning process
 - Water Management/meteorology/water control
 - Water resources development
 - Procurement opportunities with the Corps for small businesses
 - Flood Control
 - Wetland systems
 - Maintenance Of Navigation Projects
 - Maintenance of navigation projects, planning and construction
 - Beneficial Reuse of Dredged Material
- Disposal Area Management**
 - Maintenance Dredging Program
