APPLICATION FOR REHABILITATION ASSISTANCE FOR STORM DAMAGED FLOOD CONTROL PROJECTS

Typhoon Cimaron (23W) August 22, 2018

PUBLIC NOTICE DATE: August 22, 2018

APPLICATION PERIOD EXPIRES: September 21, 2018

Public Sponsors of flood control projects that sustained damages due to Typhoon Cimaron (23W) on August 22, 2018, throughout the U.S. Territory of Guam, have until September 21, 2018, to apply for Public Law (PL) 84-99 Rehabilitation Assistance from the Honolulu District, U.S. Army Corps of Engineers (Corps).

The Corps has authority under PL 84-99 to supplement local efforts in the repair of both Federal (Corps-constructed, locally operated and maintained) and non-Federal (constructed by non-Federal interests or by the Work Projects Administration) flood control projects damaged by effects from the tropical storm.

a. For a Federal flood control project to be eligible for Rehabilitation Assistance, it must be in an Active status by having passed its last Inspection of Completed Works inspection.

b. For a non-Federal flood control project to be eligible for Rehabilitation Assistance, it must have been inspected, evaluated, and accepted into the Corps Rehabilitation and Inspection Program (i.e., granted Active status) prior to the onset of the tropical storm, and still be Active (based on the latest Continuing Eligibility Inspection) at the time of the tropical storm.

c. Rehabilitation Assistance will be provided by the Corps only when the work is economically justifiable, the damage was sustained during the recent tropical storm event, and the cost of repairs is more than \$15,000.

d. Rehabilitation Assistance for a non-Federal project is cost shared between the Public Sponsor and the Corps. The Public Sponsor must provide 20 percent of the cost of the Rehabilitation Assistance.

If applicable, all requests for assistance made to the Corps will be coordinated with the Federal Emergency Management Agency and the Natural Resources Conservation Service to prevent duplication of benefits.

If the Public Sponsor believes that its project may qualify for Rehabilitation Assistance, a written request must be submitted to the Corps at the address above. The request must be signed by an officer or responsible official of the Public Sponsor, and must include:

- Name and telephone number of the Public Sponsor's point of contact;
- Legal name of the flood control project;
- Date and results of the last inspection by the Corps of Engineers;
- Location of the project by township, section, range, city, and county;
- Location(s) of the damaged section(s), and extent of the damage at each location; and
- Waterway causing the flood, if applicable.

Upon receipt of the Public Sponsor's request, the Corps will initiate actions to determine presence of significant Federal interest and the scope of rehabilitation assistance. If you have any questions, contact the Corps, Jeff Daniels, at (808) 835-4014 or email cepoh-em@usace.army.mil for assistance.
