• Complete Table 1 - Required

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

• Complete Table 1 - Required

- ☐ This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.

D. ADDITIONAL COMMENTS TO SUPPORT AJD: See tables 5 and 6 below for jurisdictional rational.

¹ In many cases these excluded features will not be specifically identified on the AJD form, unless specifically requested. Corps Districts may, in case-by-case instances, choose to identify some or all of these features within the review area.

Jurisdictional Waters of the U.S.

Default field entry is "N/A". Delete "N/A" and fill out all fields in the table where applicable for waters/features present in the review area.

Identify flowpath to (a)(1)-(a)(3) water or attach map identifying the flowpath; explain any breaks or flow through excluded/non-jurisdictional features, etc.
Keokea Gulch	Ephemeral	Pacific Ocean	Yes	The review area contains 1.23 acres of Keokea Gulch; an ephemeral channel (R6). This channel has a break created by South Kihei Road which may have contributed to the formation of the onsite wetland. No visible surface connection to a downstream resource was identified, however, this tributary is still jurisdictional by rule based on the definition of Tributary in 33CFR328.3(c)(3) and Neighboring as it is in the 100 year floodplain and within 1500 feet of the Pacific Ocean (33CFR328.3(c)(iii)).

Table 6. (a)(6) Adjacent Waters

(a)(6) Waters Name	(a)(1)-(a)(5) Water Name to which this Water is Adjacent	Rationale for (a)(6) Designation and Additional Discussion. Identify the type of water and how the limits of jurisdiction were established (e.g., wetland, 87 Manual/Regional Supplement); explain how the 100-year floodplain and/or the distance threshold was determined; whether this water extends beyond a threshold; explain if the water is part of a mosaic, etc.
Freshwater Emergent Wetland	Keokea Gulch and the Pacific Ocean	The 1.83 acres of freshwater emergent wetland (PEM) onsite were delineated according to the "Regional Supplement to the Corps of Engineers Wetland Delineation manual: Hawaii and Pacific Islands Region." The boundaries were identified by changes in the dominant plant species. The distances required for jurisdiction were calculated using the delineation report and Google Earth Pro. The wetland is adjacent to Keokea Gulch identified in Table 5 above and neighboring the Pacific Ocean as it is within the 100 year flood plain and 1500 feet of the high tide line and is thus jurisdictional by rule (33CFR328.3(a)(6) and (c)(2)(ii-iii)).
