NAVIGABLE WATERS PROTECTION RULE**

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 3/3/2021

ORM Number: POH-2021-00035 (Benjamin Parker Elementary School, Drainage Ditch Improvements, Kaneohe, Oahu, HI)

Associated JDs: N/A

Review Area Location¹: State/Territory: Oahu, Hawaii City: Kaneohe County/Parish/Borough: Honolulu

Center Coordinates of Review Area: Latitude 21.414382 Longitude -157.797316

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: A site visit was conducted to determine if waters of the United States are present in the area where improvements to a drainage ditch located at Benjamin Parker Elementary School in Kaneohe, HI are proposed. The ditch is used as stormwater runoff to prevent flooding in the soccer field adjacently located. The site visit was conducted on February 26, 2021 at 1100 on a partly cloudy day. The channel inside the drainage ditch was completely dry and had trash strewn throughout. The site had a slight change in slope from the field down to the drainage ditch. In conclusion, based on 33 CFR 328.3 (b)(5) Ditches that are not waters identified in paragraph (a)(1) or (2) of this section, and those portions of ditches constructed in waters identified in paragraph (a)(4) of this section are non-jurisdictional waters. The Corps determination of the Benjamin Parker Elementary School drainage ditch site is that it consists of a drainage ditch with the sole purpose of stormwater run off and was built in uplands and does not contain wetlands, streams, or other waters regulated by the Corps.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
